

# PetroPhase 2017

*Le Havre - The 18th PetroPhase Conference will be held in Le Havre (Normandie, France)*

Du 10 juin 2017 au 14 juin 2017

PetroPhase is a conference dedicated to the study of the properties and chemistry of petroleum fluids and their effect on producing, processing, and refining in the upstream, mid-stream, and downstream industries. The conference was first started in 1999 as "The International Conference on Petroleum Phase Behavior & Fouling" and has since evolved into an annual event alternating venues among international cities. It has been fortunate to have enjoyed financial and organizational support from many academic and industrial organizations through the years. In particular, the conference is traditionally organized each year by different volunteer organizations.

**Total, the University of Pau and the University of Rouen-Normandy** are Proud to organize the 18th PetroPhase conference.

The **18th PetroPhase Conference** will be held in **Le Havre (Normandie, France)** conference center from **June 11 – 15, 2017**. The conference will have oral and poster presentations from leading experts in academia and industry. In addition, the conference receptions and social events allow attendees ample opportunities to interact with colleagues working in or in the support of the petroleum industry. Opportunities also exist for scientific equipment vendors to exhibit products.
